Work Rights: International Student Visa (Subclass 500). Fortnightly student work rights during semester and unrestricted 24/7 work rights during breaks. Available for rotating shifts, with full regional mobility and personal transport.

PROFESSIONAL SUMMARY

Analytical, hands-on Data Science and Software Engineering professional with a B.Tech in Computer Science Engineering (CGPA 8.6), currently completing a Master of Data Science (Specialisation in Artificial Intelligence) at the University of Southern Queensland (USQ). Brings 1 year of software engineering experience at Jellyspace, with practical backend, AI and data projects, including sensor-driven and geospatial analytics. Also has proven reliability in customer-facing, inventory-intensive fuel and retail operations, working rotating shifts in fast-paced, safety-compliant environments. Physically active and comfortable working on the floor as well as at the keyboard.

TECHNICAL & OPERATIONAL SKILLS

Data Science & AI: Python, Machine Learning, Predictive Modeling, NLP, Generative AI, LangChain, Groq AI, Ollama
Software & Backend: Java, C++, Spring Boot, REST APIs, Kafka, Microservices
Databases & Cloud: PostgreSQL, MongoDB, MySQL, AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes
Operational & Systems: Real-time Inventory Reconciliation, Stock Replenishment, Automated Reporting, Sensor/IoT Systems, Quality Compliance, Process Optimization

PROFESSIONAL EXPERIENCE

Customer Service & Operations Attendant (Part-Time) **Mar 2026 – Present**
Liberty Fuel Station, Dalby, QLD

- Delivered fast, accurate customer service by operating POS registers in a high-volume, fast-paced environment.
- Maintained stock accuracy by conducting inventory audits, receiving deliveries and replenishing fuel-station and food lines, reducing shortages and wastage.
- Upheld safety, food handling and compliance standards on rotating shifts while managing competing priorities during peak periods.

Software Engineer **Jun 2025 – Jun 2026**
Jellyspace (Remote)

- Engineered blockchain-based data integrity pipelines that strengthened platform security and decentralization across core components.
- Built a geospatial intelligence widget that processes satellite data to predict safe and danger zones for PEZ/WEZ exclusion events, giving users faster situational awareness.
- Resolved production issues in a distributed platform by leading debugging and testing, improving system stability and reliability.

Software Engineering Virtual Experience **Apr 2025 – Jun 2025**
JPMorgan Chase & Co. (Forage)

- Delivered a backend data-processing system across 5 simulation tasks using Spring Boot, Kafka listeners, REST APIs, JPA and an H2 database, and integrated an external Incentive API.

SDE Intern **Jul 2024 – Dec 2024**
Elevatebox

- Improved data-processing efficiency and system performance by developing scalable Java backend services and RESTful APIs.
- Optimized SQL and NoSQL database operations supporting React and Node.js applications, collaborating with cross-functional Agile teams to accelerate feature delivery.

KEY APPLIED PROJECTS

- **AI-Driven Smart Irrigation System:** Designed an AI-powered system that analyzes real-time sensor and weather data to optimize irrigation scheduling, conserving water and improving crop yield.
- **Bidirectional Load Balancing in Kubernetes (Research Paper, ICCIML):** Researched and proposed load-balancing strategies that improve resource allocation and reduce latency in distributed environments.
- **Smart Summarizer: AI for YouTube Videos:** Built an LLM-based summarizer using Groq AI, Ollama and LangChain for accurate, concise content extraction.
- **QR Code Automated Attendance & Tracking System:** Developed a QR-based system with secure database integration enabling real-time check-ins and replacing manual tracking.

EDUCATION

Master of Data Science (Specialisation in Artificial Intelligence) **2026 – Present**
University of Southern Queensland (USQ), Australia

Bachelor of Technology, Computer Science and Engineering **2021 – 2025**
NNRG College of Engineering, India

- CGPA: 8.6. Led student initiatives as Events Head, coordinating technical and cultural events.

CERTIFICATIONS

AWS Solutions Architect | Full Stack Web Development (Pantech Solutions) | Java Development Intern (Cognifyz Technologies) | Haptic Control of Robotic Devices | GEN-AI Hackathon | Smart India Hackathon
